

Corporate Presentation

FALL 2017

Forward Looking Statements

Information set forth in this presentation may contain forward-looking statements. Forward-looking statements are statements that relate to future, not past events. In this context, forward-looking statements often address a company's expected future business and financial performance, and often contain words such as "anticipate", "believe", "plan", "estimate", "expect", and "intend", statements that an action or event "may", "might", "could", "should", or "will" be taken or occur, or other similar expressions. By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following risks: the risks associated with outstanding litigation, if any; risks associated with project development; the need for additional financing; operational risks associated with mining and mineral processing; fluctuations in gold and other commodity prices; title matters; environmental liability claims and insurance; reliance on key personnel; the potential for conflicts of interest among certain officers, directors or promoters with certain other projects; the absence of dividends; competition; dilution; the volatility of our common share price and volume; and tax consequences to U.S. Shareholders. Forward-looking statements are made based on management's beliefs, estimates and opinions on the date that statements are made and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change. Investors are cautioned against attributing undue certainty to forward-looking statements.

Champion Opportunity

- Management and Technical team with proven success with the development of precious metal projects in North America
 - Carlisle Goldfields, US Silver, Patricia Mining, Western Goldfields
- **Highly prospective gold property in Idaho with considerable grade potential**
 - **Prof. *Wagner Report (1946)* : Reports on over 390 underground channel samples from nine Baner Mine Tunnels**
 - **Baner Mine produced from 1939 to 1940: Bunker Hill Smelter reported 60 tons of High Grade Material received yielding 54.6 ounces of gold and 144.2 ounces of silver**
- Project is 100% owned in a mining friendly jurisdiction, additional staking continues in the area
- In close proximity to infrastructure-roads, power, fully functioning towns
- Seed Round Financing of up to US\$1.5 million

Management and Technical Team with Proven Success

IdahoChampion.com

Bruce Reid *Chairman*

Former Chairman and CEO of Carlisle Goldfields Limited; Founding Shareholder of US Silver

Jonathan Buick *President and CEO*

Managing Director of Harp Capital Corp. and Buick Group Corp. Has successfully raised +\$400 million over his career

Paul Fornazzari *Director*

Partner – Corporate, Securities and M&A. Global Mining Group Head of Latin America at Fasken Martineau DuMoulin LLP

Idaho
County
Idaho, USA

The Baner Project

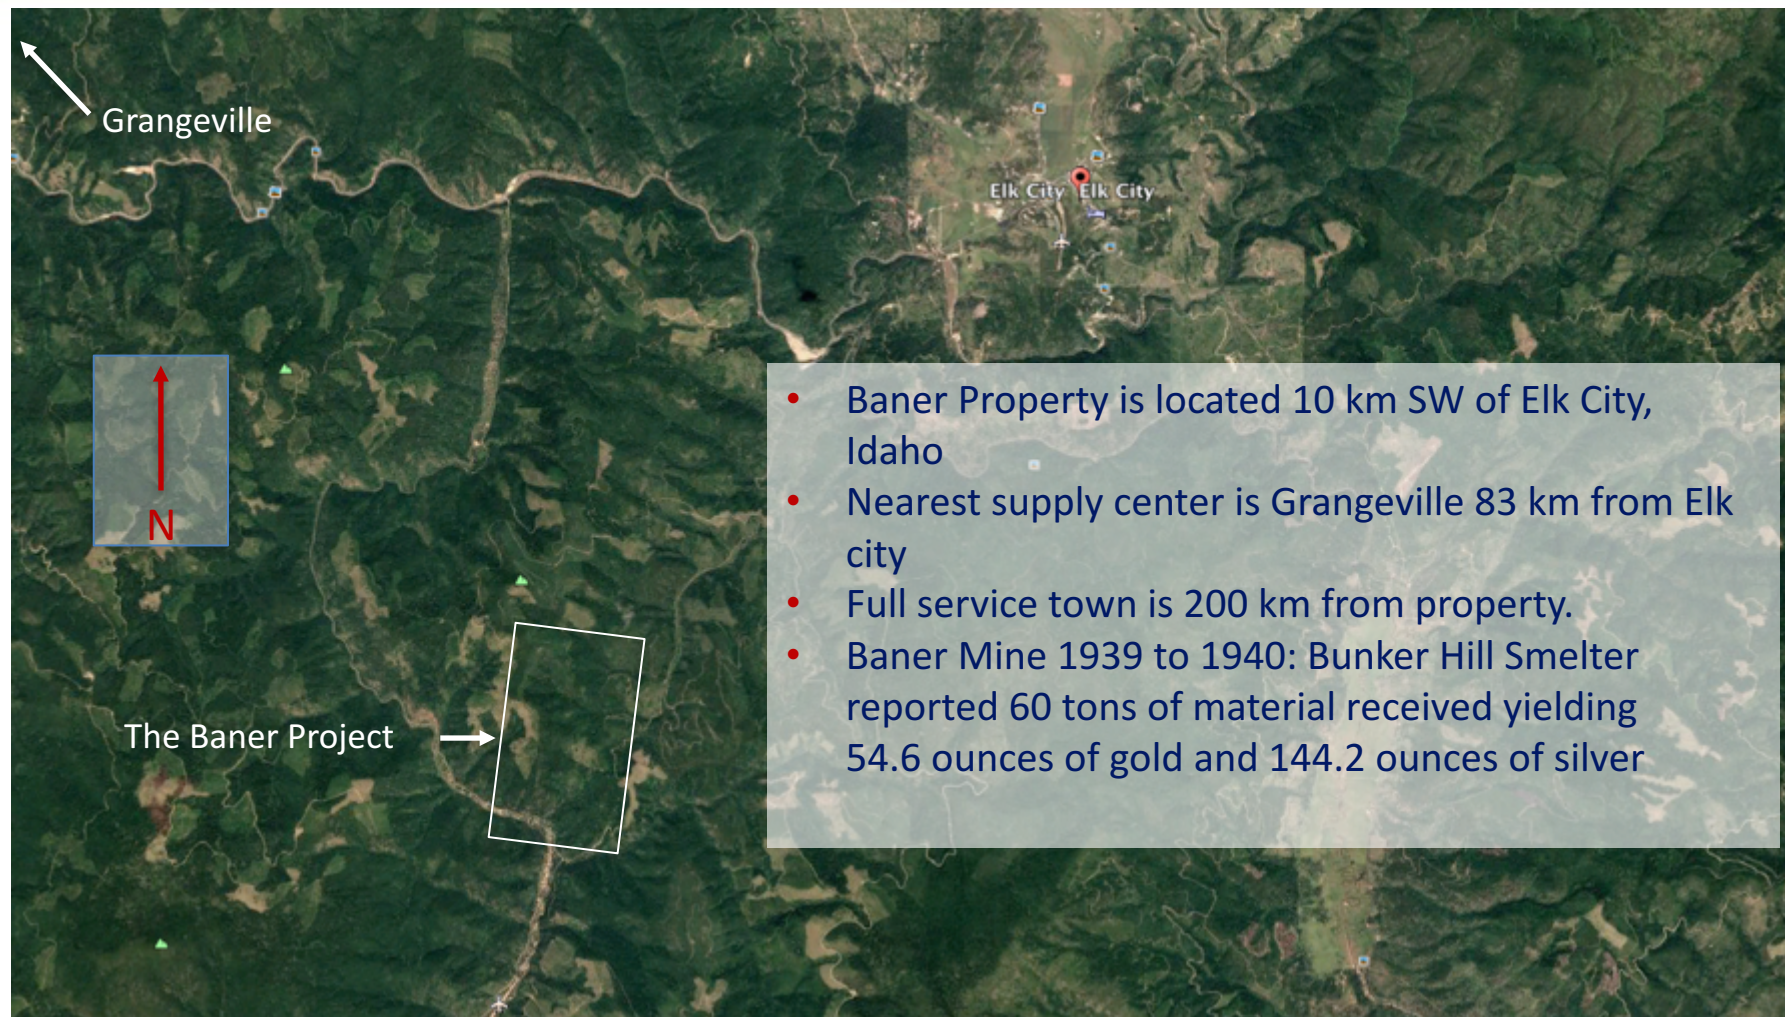

- Consists of two Properties wholly owned with no NSRs
- 68 Claims totaling 622 Hectares of land surrounding both the Baner and Champion Claims was staked in the fall of 2016
- The Baner Property has been optioned by Idaho Champion Resources to explore and develop , initial payment of US\$300,000 made in November of 2016 with final payment of US\$250,000 October 31, 2017. Earning 100% of the property with no NSRs
- The company is negotiating the purchase of an adjacent property which is directly South of the Baner Property

Dr. Wagner Report: 1946

- Professor Ed Wagner-Dean Dept. of Geology, University of Idaho
- Dr. Wagner was engaged in 1940 by the owner of the Baner Property to assess the potential of the Property
- He published his report in 1946 after finishing a significant sampling program from the underground workings mined during the 1920's.
- 46 samples taken from exposed Quartz veins averaged 22.8 grams/Ton*
- These grades mirror the grades anecdotally reported from the 1920s mining
- 364 Channel samples were taken every 5 ft (completed in 1945-6) from the wall of all 9 production tunnels from the 1920 workings.
- These samples were assayed at the Bunker Hill Smelter, a recognized and certified Lab
- The average grade was reported as approximately 1.9 grams/ton.*
- Professor Wagner estimated 75 million Tons bounded by the area he sampled*

The historical estimate pre-dates NI 43-101 as no category of resource was stated. A qualified person has not done sufficient work to classify the historical estimate as current mineral resources. Confirmatory drilling, assay analysis and computation by a Qualified Person (within the meaning of NI 43-101) would be required to determine and categorize the mineral resources. The Company is not treating the historical estimate as current mineral resources.

Idaho County, Idaho: a Gold History

Idaho County, Idaho: a Gold History

Baner Property: History

1897: Frank Baner stakes 11 unpatented mining claims; mines gold in the 1920s

During the 1920's Baner and associates drive 9 Tunnels into the "Baner Property" and recovered material with an estimated grade of 0.66 oz/T

1946: Ed Wagner authors report on assays from Baner Mine – Infers a multi-million oz Au resource*

2010 to 2012: Premium Exploration conducts ground soil sampling, and runs surface IP Geophysical survey

2016: Idaho Champion Gold Mines LLP options claims from Prey Family; stakes 68 claims on trend and submits drilling permit.

There is a wide Aplite Dike structure running North-South through the Baner Claims that was identified by Wagner as the possible source of the Gold

Mineralization was later confirmed by Premium Exp. with both Ground Sampling and Airbourne IP Survey

This Property was soil sampled in 2010 with a surprisingly high grade zone running North-South over the core of the property-see slide page 12

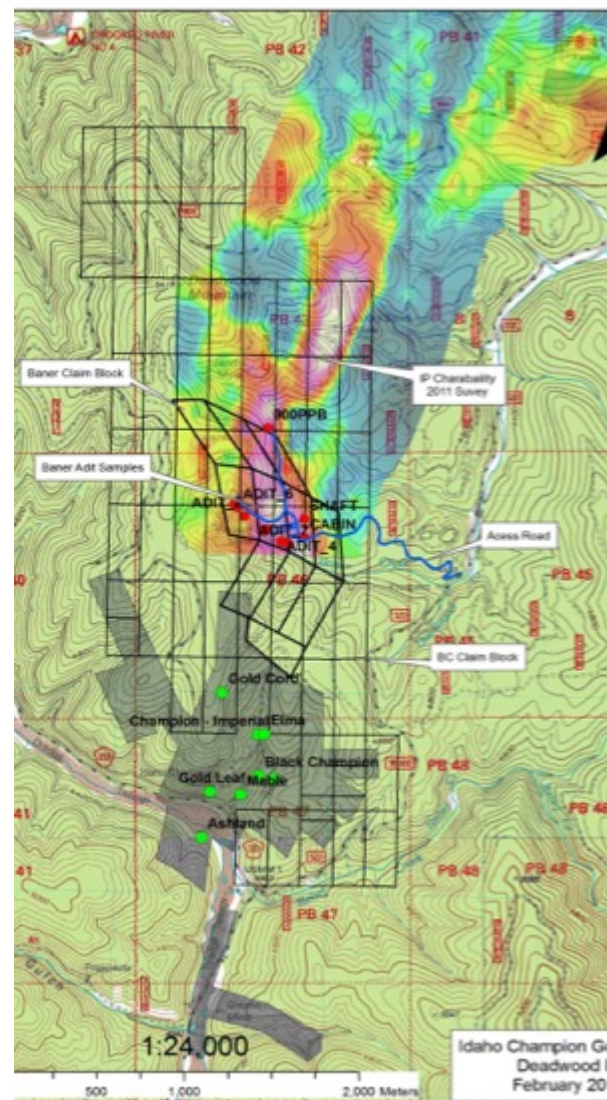

There was a Ground IP survey completed in 2011 showing the identical anomaly to the soil survey-See slide page 11

There were 7 grab samples taken by ICGM in the fall of 2016 confirming wide spread Gold Mineralization

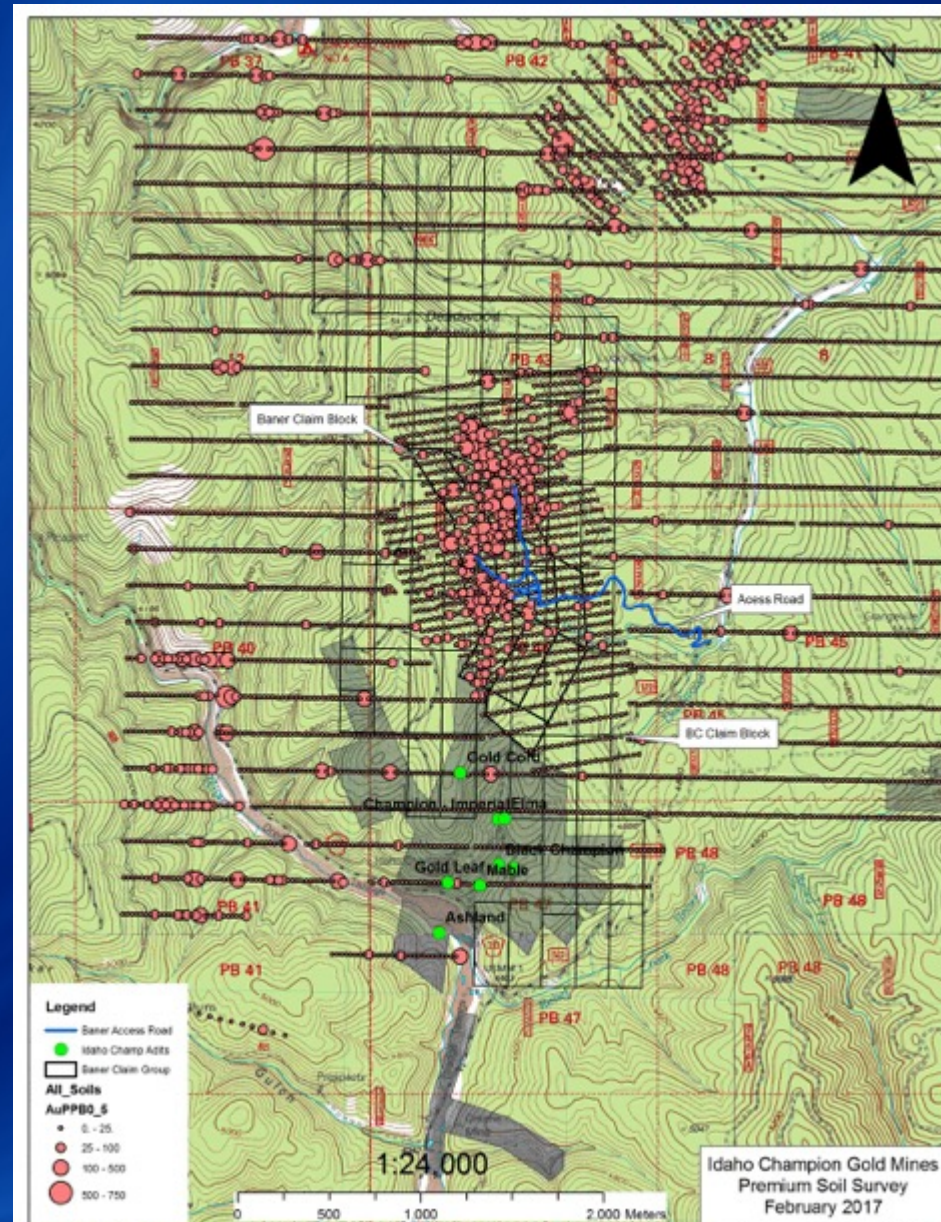

The historical estimate pre-dates NI 43-101 as no category of resource was stated. A qualified person has not done sufficient work to classify the historical estimate as current mineral resources. Confirmatory drilling, assay analysis and computation by a Qualified Person (within the meaning of NI 43-101) would be required to determine and categorize the mineral resources. The Company is not treating the historical estimate as current mineral resources.

Baner Project: Sample Results Since Acquisition

| Sample | Au g/t | Ag g/t | Comment |
|--------|--------|--------|-----------------------------------|
| Adit 1 | 8.64 | 11.9 | Quartzite |
| Adit 2 | 18.95 | 59.6 | Quartz with disseminated sulfides |
| Adit 3 | 3.50 | 89.6 | Channel across 2' structure |
| Adit 4 | 12.85 | 28.2 | Quartzite & aplite |
| Adit 5 | 0.20 | 2.9 | Outcrop – aplite dike |
| Shaft | 0.41 | 6.8 | Quartz Vein breccia |
| Shaft | 3.35 | 107 | Quartz with pyrite |

Soil Samples

The Baner Project – 2017/18 Drilling Plan

Drill permit granted October 3, 2017

Drill Site

Baner Property: Progress so far

- Since acquiring the Baner Project - Management has staked 68 additional claims forming a horseshoe around the project.
- Completed 62 samples across the project – Gold showings throughout
- Company is currently executing an IP program over the entire property package
 - Results expected mid Q4 2017
- Drilling permit submitted November 2016 Granted October 2017
 - Approved Q4 2017
 - 8,000 meter drilling program to commence
- Active field program including sampling and mapping

2017/18 Exploration Plan & Budget

- Field work for 2017/18
 - Run surface IP over southern end of BC claim group to confirm mineral trend
 - Drill permit from USFS expected in Q4 2017
 - Commence mapping and surface sampling on project area on-going
 - Commence drill operation once permits received on Baner Project
 - Initial drill program will be approximately 8,000 meters

2017/18 exploration Budget – Baner Project (US\$)

| | |
|----------------------|--------------------|
| Ground IP geophysics | 185,000 |
| Drilling | 450,000 |
| Geology | 30,000 |
| Assays | 85,000 |
| G&A | 50,000 |
| Total | US\$800,000 |

Pro Forma Capital Structure

Private Placement of up to USD\$1.5 million at USD\$0.20 per common share

Pre- Offering

| | |
|--------------------|------------|
| Shares outstanding | 18,000,000 |
| Stock Option plan | 0 |
| Warrants | 0 |
| Fully Diluted | 18,000,000 |

Current PP Offering at US \$ 0.20 per Share

| | |
|---------------|-----------|
| Common Shares | 7,500,000 |
| Warrants | 0 |

Post Offering

| | |
|--------------------|------------|
| Shares Outstanding | 25,500,000 |
| Shell Vehicle | 2,000,000 |
| Fully Diluted | 27,500,000 |
