WHAT WE DO FACILITATING PROGRESS

Clean Seed continues to be on the leading edge of an agricultural revolution through the development of the new highly advanced CX-6 SMART Seeder™. The CX-6 SMART Seeder™ offers an unrivalled level of precision in modern no-till seeding and planting and is being considered the future of farming.

We intend to extend our lead in this area by continuing to develop innovative synergistic technologies that will deliver real benefits to drive global crop production.

WHO WE ARE A TEAM OF INNOVATORS

Our team can evolve, think, innovate and produce at an incredibly high level and we pride ourselves as progress facilitators that can quickly turn viable ideas into commercially viable products.

Our convictions run deep; we designed our team to be a cross functional agricultural group of professionals representing all key user groups in the farming cycle, thus ensuring we are meeting the future needs of the industry.
